

SCARPAVAPOR LINE

by Bieffe Farinelli

- ✓ IT CLEANS
- ✓ IT DRIES
- ✓ IT OZONIZES
- ✓ IT SANITIZES

The top mark reparability index has always been our main core.

our steam generators have an excellent energy consumption/steam production ratio.

Bieffe is the promoter of the **Why throw it away?** community, encouraging refurbishment as an alternative to consumerism.

SCARPAVAPOR®

Shoes cleaning and sanitization steam generator

Steam/
detergent gun

Steam brush

Scarpavapor® is a professional, strong, and reliable steam generator whose main function is the complete cleaning of shoes, inside and outside.

While using Scarpavapor®, the operator injects steam and detergent, then, tanks to the provided special brushes, he can dissolve and remove even the most stubborn dirt from the shoe's surface, obtaining a fine result.

This generator provides a high-quality shoe drying and sanitization.

The warm air drying is quick and delicate and restores softness.

The ozone lamp eliminates bacteria and bad smells, thus entirely sanitizing the shoes.

Drying/ozone

SCARPAVAPOR® can be easily installed in smaller places and does not require any draining water system.

RELIABILITY AND SAFETY

- ✓ RELIABILITY AND SAFETY are guaranteed by the COPPER BOILER. Copper is an explosion-proof and anti-scale material. The heating elements are outside the boilers, so they NEVER come into contact with water.
- ✓ The whole production is made in Italy, in our building based in Pesaro.

SPARE PARTS AND ASSISTANCE

- 🕒 BIEFFE guarantees the shipment of spare parts and accessories in a very short time. Our efficient telephone technical assistance service is also at your disposal. Spare parts always available over the years.
